

Thaw and Culture Details

Cell Line Name	FHS020i-sh1441G		
WiCell Lot Number	DB67094		
Provider	Harvard Stem Cell Institute – Dr.Chad Cowan		
Banked By	Harvard Stem Cell Institute – Dr.Chad Cowan		
Thaw and Culture Recommendations	The Provider recommends thawing 1 vial into 2 wells of a 6 well plate. The Provider recommends thawing using ROCK Inhibitor for best results.		
Culture Platform	Feeder Independent		
	Medium: mTeSR1		
	Matrix: Matrigel		
Protocol	WiCell Feeder Independent mTeSR™1 Protocol		
Passage Number	p23 These cells were cultured for 22 passages prior to freeze and post colony picking. The Provider adds +1 to the passage number at freeze to best represent what the overall passage number of the cells at thaw. Plated cells at thaw should be labeled passage 23.		
Date Vialed	07-April-2014		
Vial Label	FHS sh1441G P23 CB 4/7/14 MAT 1/3 10cm		
Biosafety and Use Information	Appropriate biosafety precautions should be followed when working with these cells. The end user is responsible for ensuring that the cells are handled and stored in an appropriate manner. WiCell is not responsible for damages or injuries that may result from the use of these cells. Cells distributed by WiCell are intended for research purposes only and are not intended for use in humans.		

Testing Reported by Provider

The provider has published the following testing and results for this cell line. A link to the relevant publication is provided on the cell line specific web page on the WiCell website.

Test Description	Results	Report
G-Banding Karyotype	46, XX abnormal inv(11)(p14.2q13.3)	Report not available

The provider stated the some or all of the additional analyses below may also have been performed for this cell line. For more information, links to the publication(s) and dbGaP are provided on the cell line's web page on the WiCell website where available.

- RNA Expression via hPSC Scorecard
- SNP microarray
- Differentiation into white adipocytes and hepatocytes
- Mycoplasma

Please note: Prior to shipment of these cells, WiCell will perform the following characterization assays: post-thaw viable recovery, identity by STR, sterility, mycoplasma, and karyotype.

Approval Date	Quality Assurance Approval
